D-ho™ D-I - Pur20

The PUR2o DI water purifier and demineralizer replaces slow energy wasting distillers and endless plastic jugs of distilled water, providing your dental practice with high quality water which complies to requirements for your sensitive equipment such as autoclaves, turbines and handpieces.

System (938-NWF/5SS) **\$950.00**

Identafi™ 3000 Ultra

Multi-Spectral, Oral Cancer Screening System

The Identafi 3000 Ultra is not only an Oral Cancer Screening device, but also a Complete Oral Tissue Examination Device. The Identafi™ 3000 ultra aids in the detection of bacteria, mold, yeast, and inflammation (including gingivitis). It also aids in determining the appropriate margin for surgical excision.

This powerful, multispectral, lightweight oral tissue device allows those on the front line of detection to do just that, identify biochemical and morphological changes in the cells of the mouth and oropharynx. The Identafi™ 3000 Ultra, with twice the autofluorescence power, allows you to take control over missed abnormalities and minimizes false positives often missed with the naked eye.

- Incorporates the latest marketplace innovations to deliver the finest oral cancer detection capabilities.
- Revolutionary Identafi™ technology utilizes proprietary and patented multi-spectral light wavelengths that enable early detection of oral cancer.
- Identafi 3000 Ultra's violet wavelength capability has been cited in the May '09 issue of Cancer Prevention Research as the best excitation wavelength to discriminate between neoplastic and non-neoplastic areas.
- New nickel-plated design to improve durability and deliver smoother hand feel.
- New diodes deliver double the auto-fluorescent power to ensure enhanced and thorough detection.
- Series of software upgrades improves device performance.

KaVo. Dental Excellence.

NEW! COMFORTdrive® 200 XDR

High-Speed Handpiece

Kavo Dental introduces the optimally balanced, ergonomically designed COMFORTdrive® high-speed handpiece, the handpiece you'll enjoy using all day, every day. This latest handpiece evolution offers the superior performance of electric attachments at the weight and feel of air-driven handpieces. COMFORTdrive's unique patented design weighs approximately 40% less and is 15% shorter than available electric handpieces due to innovative sterilizable, integrated micromotor technology.

COMFORTdrive® Innovations

- EMBRACE PERFORMANCE – 30 Watts of power with auto-calibration via Plug-n-Prep technology, providing precise cutting performance and concentricity
- WHISPER QUIET - 55 dB for improved doctor and patient experience
- SUPERIOR ERGONOMICS – 40% lighter and 15% shorter for an excellent fit and feel in your hand

Full Operatory Package (1007.4682) **\$4,262.99**
Includes (3) COMFORTdrive 200 XDR Handpieces, (1) COMFORTtronic control module & power supply, and (1) COMFORTbase coupling and tubing.

Traxodent™ - Premier

Hemodent™ Paste Retraction System.

Easy, effective hemostasis and retraction

- The sleek syringe with bendable tip permits easy application.
- After two minutes Traxodent™ is rinsed, leaving a clean, accessible margin.

Traxodent™ is gentle, absorbent and fast.

- The soft paste produces gentle pressure on the sulcus while it absorbs excess crevicular fluid.
- Aluminum chloride creates an astringent effect without irritating or discoloring surrounding tissue.

DENTSPLY CAULK

SureFil®SDR™ Flow

Posterior Bulk Fill Flowable Base.

The first and only flowable composite that can be placed in bulk resulting in up to 30% less procedure time! A lower stress material allows, FOR THE FIRST TIME, bulk placement for a base, thereby reducing the number of layering steps required for a posterior composite

Features include:

- SDR Technology.
- Can be placed in 4mm increments.
- Self leveling handling.
- Single Universal Shade
- Radiopaque (2.2mm al)
- Highest fracture toughness of flowables tested.

Enhance® Flex NST™

A 2 disc finishing and polishing system that allows you to finish and polish composite restorations in 48% less time, with half the steps and half the cost! New NST™ (Nano Sphere Technology) uses spherical diamond aggregates to minimize the scratches imparted on the surface of the restoration and increase the speed of polish.

Features include:

- 2 discs versus 4 discs.
- NST Technology.
- Discs are reversible
- Round grommet

FluoroCore®2+

Dual Cure Core Build-up Material + Fast Cement for Endodontic Posts.

FluoroCore®2 + Dual Cure Core Build-up Material + Fast Endodontic Post Cement consists of two components, base and catalyst, which when mixed form a dual-cured, highly filled, composite resin core build-up and post cementation material. FluoroCore®2 + uses a biocompatible urethane resin and is available in two shades, blue and tooth colored. The blue shade permits clear differentiation of the core material from tooth structure. The tooth-colored shade can be used where esthetics and show-through of the core are of primary concern.

Delivery is in a convenient, dual-barreled, 4.75 gram syringe. FluoroCore®2 + is to be used after the application of a suitable dentin and enamel adhesive, and is compatible with numerous adhesive systems, including all DENTSPLY adhesives designed for use with dual/self cured composite restoratives. When used for post cementation, FluoroCore®2 + has a working time of only 40 seconds!

Icon - Zenith DMG

Treatment for incipient caries and white spots. . .without drilling!

Icon provides an innovative, never-before-seen option for treatment of smooth surface and proximal carious lesions. Instead of taking a “wait and see” approach, Icon can arrest the progress of early enamel lesions up to the first third of dentin – in one simple procedure, without unnecessary loss of healthy tooth structure!

- Enables immediate treatment of lesions not yet advanced enough for restoration; ends “wait and see” approach.
- No drilling or anesthesia required, for greater patient comfort.
- Arrests caries progress without unnecessary loss of healthy tooth structure.
- Cosmetic treatment of cariogenic white spots in one patient visit.
- Patients with poor compliance can be treated earlier.

Icon Smooth Surface
 Mini-Kit – 2 Patient Packs (397-220402) **\$145.99**

PerfectPearl - Total Care

Disposable Prophy Contra Angles

With its unique beveled gearing, these contra angles provide smooth vibration-free operation. The soft prophy cup offers nice flare for excellent sub-gingival cleaning and the spiral grooves help push paste towards the tooth, reducing splatter. We think we've created the perfect prophy angle.

- Exceptional Interproximal Access. Easy stain removal.
- Maximum Comfort. Low vibration and chatter for all day comfort.
- Reduces Splatter. Spiral grooves on cup help push paste towards the tooth.
- Super Control. Smooth bevel gears offer low vibration.
- Latex Free Soft Cup. Offers nice flare for better sub-gingival cleaning.
- Soft Grip Pad. Easy to hold and grip.
- Economical. Competitively priced.
- Contra Angle Design. For comfortable wrists, elbows and shoulders.

200 Contra Angles per box - 6 boxes/case (442-109510) **\$121.99**

Expasyl® Strawberry - Kerr

Temporary Gingival Retraction System

Expasyl, an alternative to retraction cord, is a viscous paste used for all procedures requiring gingival retraction including: impressions, seating of restorations, fitting rubber dams, and restoring class II, III, and V cavities.

Unlike cord, you need little or no pressure to apply Expasyl, which greatly minimizes the risk of rupturing the epithelial attachment and enhances patient comfort. Expasyl is extruded directly into the sulcus where it holds its rigidity to create space between the tooth and the tissue, much like retraction cord. Bleeding and crevicular seepage are controlled through the presence of aluminum chloride, which also shrinks epithelial tissue – further expanding the sulcus.

- Excellent retraction. Physically displaces tissue for superb marginal access.
- Safe. Minimal pressure required. No danger of rupturing epithelial attachment.
- Significant timesavings. Places quickly.
- Comfortable. Much less time and force needed than with packing cord.
- Hemostatic. Controls bleeding and crevicular seepage.
- Won't dry out. New foil pouch for the capsules.

Premium Kit (320-34618) **\$334.99**
 Contains: 10 Capsules Expasyl Strawberry Retraction Paste (1 g each – 10 g total), 40 Curved Applicator Tips and 1 Manual Applicator

Herculite® Ultra - Kerr

Strong and durable for posterior restorations, excellent esthetics for anterior restorations.

Employing the latest in nanoparticle technology, this universal composite features optimal handling and high polishability, lifelike esthetics, great wear resistance, and increased radiopacity—everything a clinician needs. The resin matrix and Vita® shade matching inherent in other Herculite brands are retained in Herculite Ultra. Excellent material translucency allows chameleon-like restorations to be artfully achieved from a single shade, offering a simplified 15-shade system that is ideal for the general practitioner.

- Optimal handling, non-slumping. Superb ease of placement.
- Long-lasting polishability. Maintains lifelike luster long after initial restoration.
- Herculite gold standard technology. Proven 25+ years of experience.
- High wear strength and mechanical properties. Long-lasting and durable.
- Chameleon quality. Superior tooth-blending effect enabled by optimized filler size.
